

SteelWood Series Premium Exterior Finish

FEATURES

Strong by Design

End and center stiles are constructed with galvanized steel, providing superior strength and resistance to rust and corrosion. The SW90 has additional design options adding appearance, sound resistance and higher R Value.

A Clean Finish

The flush steel interior gives the door a cleaner look while adding strength, sound resistance, and energy values.

Protection from the Elements

Tongue and groove joint construction seals and aligns the sections providing a snug, weather-tight fit.

Keep the Outdoors Outside

The bulb-type vinyl bottom weather seal fits tight against the floor sealing out moisture, light, and energy leaks.

Smooth Operation

Galvanized steel hinges and self-lubricating rollers are designed for long life and smooth, quiet operation.

Beat the Hot and Cold

Optional laid-in-place CFC-Free polystyrene insulation provides a 6.0 R-Value on the SW30 and SW55. The SW90 offers solid-core and steel backed polystyrene for a 12.0 R-Value. The SW90 also offers a standard thermal break that minimizes transfer of exterior temperatures and drafts, and reduces everyday wear and tear between sections.

FINISHES (Actual color may vary)

SteelWood Harbor Wood

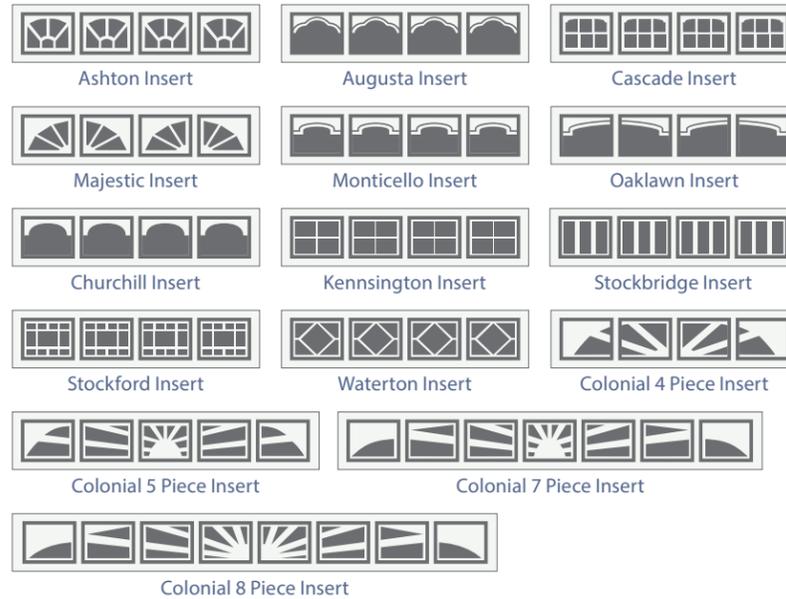

SteelWood Cedar Falls

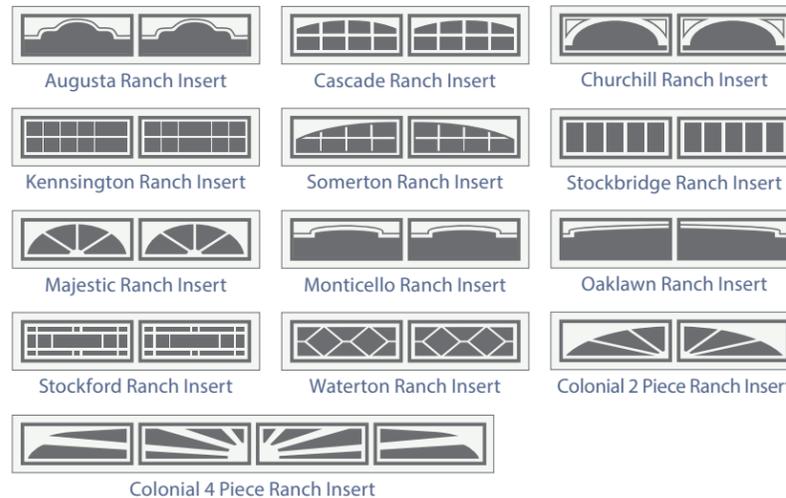

SteelWood Braised Walnut

WINDOW INSERTS*

Standard Panel Design Inserts

Ranch Panel Design Inserts
